

CURRENCIES

Administrators can enter currency conversions or pricing multipliers for various currencies that are to be supported. USD is used as a base currency. When user selects a different currency, the USD price will be multiplied by the currency factor entered by the administrator and shown in Figure 26-1.

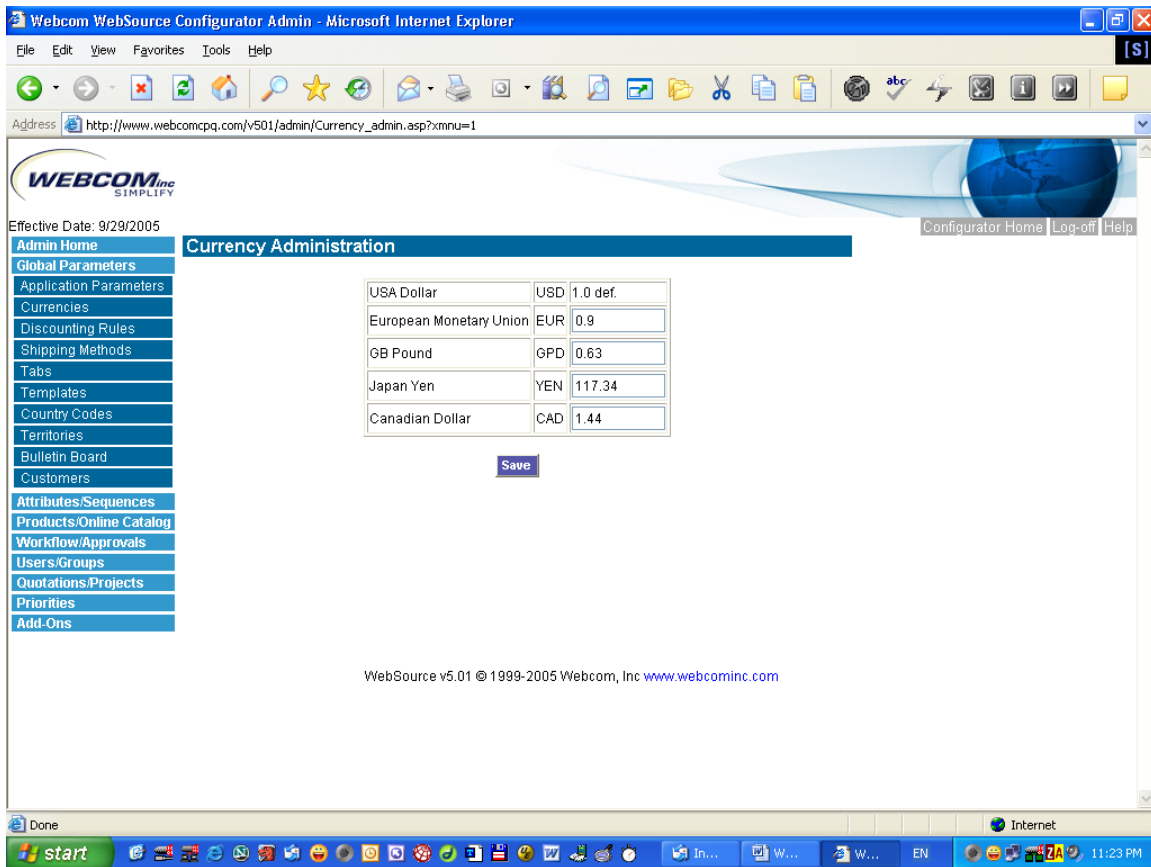

Figure 26-1 Currency Correction Factor

A user can change the home currency by selecting a desired currency from the dropdown show in Figure 26-2 below, In this example CAD are selected for this particular quote/shopping cart.
